

An aerial photograph of a dense urban landscape at night, with numerous skyscrapers and buildings illuminated by city lights. A semi-transparent yellow filter is applied over the left half of the image, creating a gradient effect. A solid red vertical line is positioned on the far left edge of the frame.

Beepr Trans

Company Profile

Since 2025

Our Position

Vision

Global BEV Smart
Mobility Solution Provider.

Mission

Every Mile is A Promise.

Target

To be One of the TOP 10
C+D Partners WorldWide.

Our Business

Innovative Models Drive Sustainable Growth

- At Beepertrans, our model of company-owned fleets with ride-hailing platforms is rooted in the principle that innovative models drive sustainable growth, ensuring long-term value for both drivers and partners.
- By focusing on pure electric vehicles and a driver-partnership ecosystem, we leverage innovative models to drive sustainable growth, aligning with global carbon neutrality goals while maximizing operational efficiency.
- Our dual strategy of scaling through platform collaborations and exploring B2B leasing services demonstrates how innovative models drive sustainable growth, enabling us to expand across markets while maintaining financial resilience.
- Innovative models drive sustainable growth not only through our revenue-sharing framework ,but also via our vertically integrated ecosystem of vehicle procurement, driver recruitment, and smart depot management.

- **Netherlands & Pan-EU**

Phase 3: Exploration in Europe, Netherlands as the Europe's new energy hub
